

# HAVE YOU HAD ENOUGH OF BIG COMPANY RESEARCH?

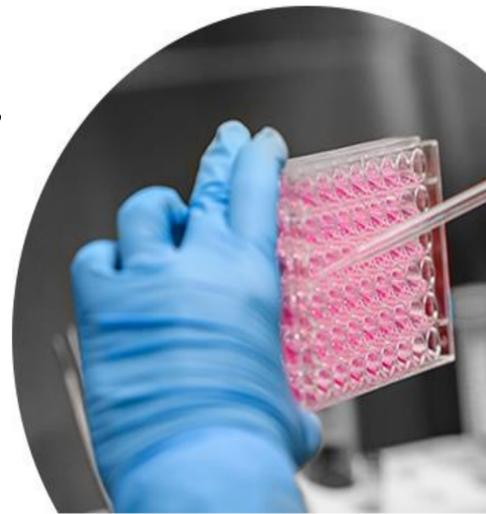

Countless hours spent in meetings?

If you are looking for a change let us know and send your CV!

- ➔ Real Research Sp. z o.o. is a young Biotechnology Start-up creating solutions for 3D cell culture and developing other technologies related to cell culture.
- ➔ **The company's mission is to change the way research in LifeScience is conducted, in particular to popularize 3D cell culture.**
- ➔ In the near future, the company will start another large project, therefore we are looking for a candidate for the following position:

## R+D SPECIALIST BIOTECHNOLOGIST

We are the only Polish startup offering ESOP (Employee Shared Ownership Program) - if Real Research succeeds, you as a member of our Team will benefit!

## SPECIFICATION

### YOUR BACKGROUND

- Minimum master's degree in biotechnology, biology, biochemistry or related field
- Track record of working confidently in the laboratory and operating laboratory equipment, preferably with 5 years of experience
- Experience in handling cell cultures- tumor cell culture and tissue culture
- English at communicative level (B2 minimum)
- Good work organization, creativity and initiative
- Ability to work in a team
- Timeliness in performing assigned tasks and diligence in keeping documentation
- Confident using MS Office
- Experience in handling EU subsidy settlements would be an advantage
- Experience in isolating cells from human tissues would be an advantage
- Experience in qPCR, IHC tests would be an advantage
- Experience in clinical trials would be an additional advantage

### KEY RESPONSIBILITIES

- Performing short- and long-term cell cultures (mainly 3D cell culture, tissue cell culture, PDX culture)
- Working with human and animal material: cell isolation, cell culture and drug testing
- Analysing and testing the biological material
- Planning and organizing experiments and lab work
- Keeping project and laboratory documentation
- Analysing and interpreting results
- Taking care of laboratory equipment and auxiliary materials
- Carrying out activities aimed at quality improvement of the developed technologies
- Openness to other tasks e.g. contacting clients and partner companies

### THE POSITION

- There can be some flexibility in job roles - consider applying even if your skill set is not an exact match
- Depending on experience, the position title is negotiable

### WE OFFER

- Full-time position
- Challenging work in a friendly atmosphere
- Initial 3-month trial period; extension of employment contract assuming satisfactory performance
- Employee Shared Ownership scheme after 1 year
- Work with an international team in a modern building with free access to gym and sauna (Jagiellonian Innovation Center)
- Flexible working hours
- Opportunity for professional development in various directions

**WE ARE LOOKING FOR BIOTECHNOLOGY ENTHUSIASTS WITH A WIDE RANGE OF INTERESTS. WORKING IN REAL RESEARCH IS A CONSTANT CHALLENGE AND AN OPPORTUNITY TO BROADEN EXPERIENCE. THE COMPANY IS AT THE INITIAL STAGE OF DEVELOPMENT, SO THERE ARE MANY POSSIBLE CAREER PATHS.**

Due to the current situation, we offer an interview in the office - in compliance with all currently applicable safety standards - or an on-line interview.
