

Data 4 Healthy Recovery Hackathon

Why this hackathon?

Industrial transformation and post-COVID recovery give us a unique perspective to rethink existing economic and social models.

Now is the time to:

- use that insight to build innovative tools and solutions
- help the European companies and organisations reshape their business models
- make the European industry more resilient towards the future

We want to contribute to the long-term social and economic recovery in Europe by tackling the most relevant smart health challenges that could give that extra boost to the European Industry as a whole.

The project is undertaken on behalf of the European Commission, Directorate General for Internal Market, Industry, Entrepreneurship and SMEs and the Executive Agency for Small and Medium-sized Enterprises (EASME) by Civitta and Garage48.

#COSME_EU

#data4EUrecovery

What are the challenge categories?

1. Safe workplace of the future
2. Data extraction and centralisation for better decision making
3. Improvements for medical manufacturing
4. Public space safety for customers
5. Medicine demand forecasting
6. Safe use of medical data
7. Smart mental health solutions for employees
8. Solutions for teambuilding
9. Threat tracing
10. Food consumption awareness
11. Personalised predictive medicine
12. Real-time health monitoring and remote care

How does the hackathon work?

**10 OF THE MOST BURNING CHALLENGES IN THE
INDUSTRY'S / 30 BEST TEAMS / WORLD-CLASS EXPERTS
AND MENTORS**

- 18-20 of June, fully online.
- During the hackathon, participants will try to find creative smart-health solutions to recover from the COVID-19 pandemic.
- The goal of the program is to come up with new ideas and form teams around them to build the idea into a prototype - to test if the idea is valid. Participating teams have been chosen beforehand.
- By the end of 48-hours, the expected outcome is:
 - First feedback from stakeholders, customers, end-users
 - The initial business case
 - First marketing ideas
 - A prototype of the digital solution
- The winner is chosen based on the prototype that is built and the impact the solution has on the beneficiaries lives

Agenda of the hackathon

Day 1: kick-off and 1st workday

10.00 kick-off. Welcome words

12:00 Checkpoint #1 Lead mentors check the teams for their plans for the hackathon. Understanding the problems solved

13.00-18.00 Teams get to work, mentors check in

18.00 Checkpoint #2 Evening check-in with lead mentors.

Day 2: work, focus, work, repeat

10.00 Checkpoint #3 Lead mentors check the teams for their progress. Understanding which skills are needed from mentors.

11.00-12.00 Mentor check-in

12.00-15.00 Mentoring hours. Teams can reach out to mentors when needed.

15.00-16.00 Pitch training for team leads. How to prepare your demo.

18.00-19.00 Checkpoint #4 Teams show their prototypes. Get last feedback from the mentors.

Mentors join the checkpoint to give feedback on the demos.

Day 3: final

10.00 Final deadline to upload the final presentation and videos.

11.00-12.30 Final webinar streamed of the teams work

12.30 Jury makes the final decision

13.00 Final awards and closing ceremony

NB! The times are tentative and the final schedule will be confirmed in the beginning of the June

How does mentoring work?

- During the checkpoints lead mentors will see the teams progress and what kind of mentoring they need.
- There will be regular check-in calls between the lead mentors and all the other mentors to make sure that all the mentors know what they are suppose to do and feel that their time is efficiently spent
- The organizing team and lead mentors will connect the teams and mentors with each other, based on the teams needs in the checkpoints.
- Teams are able to book short coaching sessions with expert mentors (20-25 minute max) during the times when experts have marked themselves available. We will help to set up the calendar application and Zoom integration for all the mentors.
- Mentors will have to give guidance and push teams to get first customer validation. Mentors should not do the work for the teams themselves. If you notice that the team needs other mentors help, let the lead mentors know about it.
- Tools we that the mentors will use during the hackathon: Google Sheets, Calendly, Zoom, Slack and Eventornado

Types of mentors

Host / Boss mentor

The boss-mentor will coordinate the workflow of all the other mentors and is also responsible for properly briefing the lead mentors, challenge mentors and expert mentors. Boss mentor assigns the lead mentors to the teams they will be responsible of. Boss mentor will be responsible for briefing the jury and leads the evaluation procedure and jury work.

Lead mentors

The hackathon teams will be divided among the lead mentors. Each lead mentor will be responsible for 5 teams. They will run checkpoints to check the progress of the teams, take notes during the checkpoints and direct the teams towards the expertise they need (design, development, field experts). Lead mentors are chosen by the hackathon organizers and have prior experience with coaching both hackathon teams and early-stage startup teams. Lead mentors are available throughout the whole duration of the hackathon.

Challenge specific mentors

Challenge specific mentors come from the partners that have proposed the particular challenge. They will be sharing their insight on the challenge they have provided to the teams that are working on the challenge. Challenge specific mentors are not responsible for connecting the teams with the expert mentors. Challenge specific mentors have to be available throughout the whole duration of the hackathon.

Expert mentors

Mentors with a specific skillset, who will help the teams when needed (design, development, healthcare specialists, engineers, business professionals or specialist on other specific fields). Expert mentors will mentor the teams based on the specific needs of the teams. Teams can book the coaching sessions with the mentors and lead mentors can assign the expert mentors to specific team, when their help is needed. Expert mentors should be available approximately 4-6 hours during the course of the hackathon. The availability is marked prior the hackathon.

#data4EUrecovery

What kind of mentors are we looking for?

We are looking for expert mentors in the following categories:

- Tech mentor (front-end and back end development)
- Data scientists and experts
- Design mentors (UX and UI)
- Product mentors
- Business mentors (business development, marketing , investment specialists, etc.)
- Governmental
- Experts on a wide variety of fields which the challenge topics call for

#COSME_EU

#data4EUrecovery

Why join us as a mentor?

- Get a hands-on experience on working with early-stage teams and help them think through their idea. Who knows, perhaps you will witness the birth of a new unicorn!
- A chance to meet and network with other industry key-players and create long -lasting relationships
- A special post about you in the event's Facebook page with your name, title and few words about your expertise.
- Contribute to the birth of new ideas and businesses and to the long-term socioeconomic recovery
