Coquus is a software application
for the food service management in communities
specialized in hospitals and nursing homes

COQUUS

from diet management to improve nutrition with technology

COQUUS

- +20 years working with hospitals

- Outstanding references by size and complexity

- Best level in integration and automation to achieve outcomes as Safety, Experience and Efficiency

- Market growing both geographic and functional, from hospitals to nursing homes, schools and others

The information challenge
in the hospital food service

A hospital with N patients also have…

+ admissions, discharges, moves, operation, diet changes…

x tens of diets

x 4 intakes

x different dishes for intake

x dishes options

x alternative dishes according to the allergies, intolerance, tastes and other patient traits

1 Doctor prescribes:
- Diet: basal, astringent…
- Allergies: egg, fish…
- Comments: no raw, grind…

2 Nursing can add:
- Allergies: egg, fish…
- Comments: no raw, grind…
- Block intakes

Diet Management Application

3 Kitchen manage the changes, produce, place in plates, deliver…

THE SECRET

to improve nutrition in hospitals

The diet management application processes that huge information flow

and its ability to digitize and automate it

has a decisive impact on the quality of feeding of patients

in parameters such as **safety**, **experience**, **nutrition**, **administrative work** and **costs**
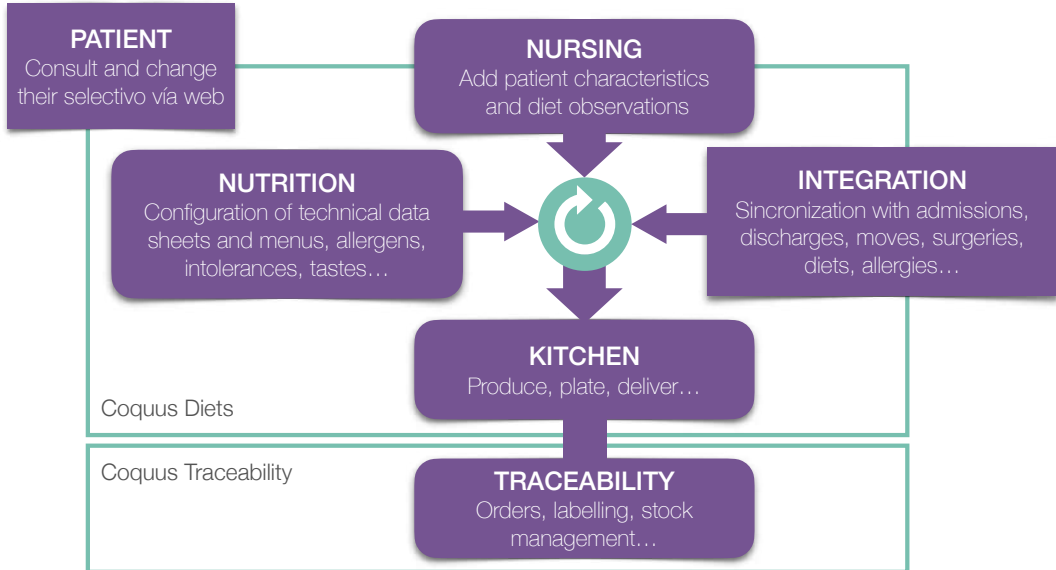

↑Safety   ↑Experience   ↑Nutrition   ↓Work Hours   ↓Costs

COQUUS FUNCTIONALITY

Users and Processes

DIFFERENTIAL FEATURES

that produce concrete and immediate benefits

Integrated information

Every dish and menu informed with:
