Information about the call for proposals

Call name and reference: EIC Pathfinder Challenge: Cardiogenomics
Deadline of the call: 19 October 2022
Deadline for submitting expressions of interest: 8 September 2022

Partner information

Country	FRANCE
Name of the organisation	Aix-Marseille University (AMU)
Short description	Aix-Marseille University (AMU) was created in 2012, resulting from the merger of the University of Provence, the University of the Mediterranean and Paul Cézanne University. It has more than 78,000 students including 10,000 international students, 7,680 faculty and staff members, 12 doctoral schools and nearly 3,300 PhD students. AMU is the coordinator of the Erasmus + European University Alliance “CIVIS”. AMU has been involved in more than 100 FP7 projects and 117 Horizon 2020 projects. AMU is the second French university in terms of participation in Horizon 2020.
Research Unit	Center for CardioVascular and Nutrition Research (C2VN)
Name of the PI + Orcid number	Pierre-Emmanuel MORANGE - Orcid 0000-0002-9065-722X
Email address	Main address : Pierre.MORANGE@ap-hm.fr Cc : nicolas.gochgarian@univ-amu.fr ; nadia.maio@univ-amu.fr ; karl.stoeckel@univ-amu.fr

Profile and expected role of the partners sought

In view of the submission of a European project, Aix-Marseille University (as coordinator) is looking for a SME based in an European Member State (except France) operating in the field of bio-medicine, which can join the consortium as partner and carry out the following tasks:

1. Design an application that enables to measure the patient’s recurrence risk depending on the ABO group (diagnostic)
2. Drug repositioning: Investigate whether the biomarkers identified to be ABO-dependently associated with VTE recurrence are known target drugs validated in other indications (therapeutics)

Following the selection of the SME, the European consortium – comprising partners from the Netherlands, Norway and France – will be completed.

Please, send us your expression of interest by 8 September 2022.
